isbn:9781428311459

The only reference of its kind for emergency responders, this updated book is a guide to the most significant points that surround the emergency response processes needed to cope with terrorism incidents. It highlights what is required to establish and implement tactical goals during such events, including new equipment and strategies that can enhance a responder's detection, monitoring, and protection capabilities against CBRNE agents ? chemical, biological, radiological, nuclear and explosive agents. Written to provide emergency responders with the knowledge and skills they need to prepare for and combat acts of terrorism, this book is a must for all emergency personnel who are called on to respond to a terrorist event.
