This book is for ages 6 to 8 years. When learning to read, children must be able to quickly identify common words, or sight words, in order to develop their reading skills. With this in mind, we have incorporated these critical words into memorable and catchy melodies to provide an invaluable resource for children learning to read. The reproducible lyrics book provides a crucial link between the songs and the written language. This series is based on the list of 220 frequently used service words compiled by Edward William Dolch, PhD, and the related list of 95 high-frequency nouns. Volume 3 is recommended for Grade 2 students.
