Objective: Be Selected to Present at Academy Day Process: Scientific Method Step 1: Formulate a Question What would it take to get Tiffany to notice Igor? Dorie is in science geek heaven at the National Academy for Gifted Youth's science program until she realizes she has gone from being a big fish in a small pond to a typically sized *Amphiprion percula* in a hyperacclimated environment of equally skilled *Amphiprion percula*. More simply, Dorie no longer rules the lab. Igor Ellis, however, does. Unlike popularity, being cool isn't about fitting in - it's about standing out. This eureka discovery leads Dorie to the solution of her latest puzzle. Eager to prove her science skills, Dorie is conducting a new social experiment. With assistance from her fabulous and fashionable best friend, Dixie, she's about to take Igor from geek to chic.
