This set of two DVDs demonstrates, via synchronized video and three-dimensional animation, how to perform ultrasound-assisted peripheral nerve blocks. It presents all blocks commonly performed for the upper and lower limbs, including infraclavicular and interscalene blocks and blocks of the sciatic nerve, lumbar plexus, and femoral nerve. Each block is presented step by step with voice-over narration and synchronized video clips of ultrasound localization of the nerve, surrounding anatomy, needle advancement, and anesthetic application. "Ultrasound-Guided Nerve Blocks on DVD: Upper Limbs" and "Ultrasound-Guided Nerve Blocks on DVD: Lower Limbs" can be purchased either separately or together in a money-saving package. Note: These DVDs are not Mac compatible.
