"Families of Adults with Autism" is a collection of real-life stories of people on the autism spectrum growing up, as told by their parents and siblings. The individual accounts explore the challenges that families of people with autism have faced, and the techniques they have used to improve the quality of their children's lives, from mega-doses of vitamins and dietary changes to intensive interaction. The contributors also relate how they have worked with their children or siblings to help them to function at their highest possible level, be it showing an awareness of their environment, holding down a full-time job in a local store, competing in the Special Olympics, or achieving international recognition as an artist. This book will offer practical and heartwarming advice to families who are affected by autism spectrum disorders, and provide insights for professionals working with people with ASDs.
