Best defined as the art of shaping the built environment, urban design seeks to understand and analyze the variety of forces—social, economic, cultural, legal, ecological, and aesthetic—that affect how we live. The complex challenges facing cities today—scarcity of resources, growing economic divisions, and rampant sprawl, among others—are forcing a reconsideration of urban design. New Urbanism, a leading

movement within urban design, advocates a return to small-town urban forms: human-scale, pedestrian-friendly streets, a reinvigoration of cities, and a stop to suburban sprawl. This new volume, drawing on a conference and debates at the Royal Institute of Technology in Stockholm, Sweden, comprehensively examines New Urbanism today and speculates about it's future. With contributions from Christopher Alexander, Leon Krier, Peter Hall, Andrés Duany, Elizabeth Plater-Zyberk, Jeff Speck, William McDonough, Peter Calthorpe, Jan Gehl, Lars Lerup, Edward Soja, and Saskia Sassen, among others, New Urbanism and Beyond is both a comprehensive primer on urban design and a provocation for practitioners, historians, and citizens everywhere.
