All the splendor, majesty, Byzantine plotting, and senseless destruction of the first three Crusades, designed for the Wildside Gaming System (but easily adapted to other systems) Contains all the resources a GM needs to build a Crusades-based campaign,

whether the players are in the roles of princes or peasants, Crusaders or Caliphs. Nearly a century of history is covered, allowing for long campaigns, and the book spills over into a variety of environments in Europe and the Middle East. Want to run a Byzantine campaign? An adventure centered on a mountain fortress in Lebanon? It's all here: everything you need to know to live or die in world-spanning adventures from 1094-1192.
