Any desperate, lonely, helpless woman can learn to become a perfect, ninja socialite (with the power to move physical objects with her mind). Other self-help book authors will try to tell you that there's something wrong with you. Wendy Molyneux is here to tell you that everything is wrong with you. The good news is that if you read this book, and put its advice into action, you will not only become the perfect woman - impeccably dressed, well-spoken, well-married, great at entertaining and the sexual arts, and the mother of a brood of exemplary children - you will also acquire ninja powers and be able to control physical objects with your mind. Does it promise a lot? Yes. But that is what this age is about. Making empty promises in order to acquire a vast personal fortune. Seriously, what is wrong with you? Again, to re-emphasize, everything.
