What if you knew the location of the Garden of Eden? To what lengths would you go to protect it? Imagine a lost world where animals have been sheltered from extinction since the Ice Age???a "Noah's Ark" threatened by poachers. In "Chateau Beyond Time," celebrated explorer, author and filmmaker Michael Tobias draws us into an exquisite kingdom: a sublime refuge with fiercely protected surroundings. This chateau, nestled within an unexpected wilderness in the heart of France, has only been known to artists, philosophers and kings: the exclusive members of a secret society of guardians dating back to the dawn of humanity.
