A beautifully illustrated picture book, "Katie Caught a Cold" is about a polar bear cub who starts sneezing just before the Ice Show in which she is skating. Her mother takes excellent care of Katie's cold at home and calls their hippopotamus pediatrician, Dr. Hippo, for advice. The story is accompanied by a helpful "Parent Guide" in which common questions are answered by the pediatrician author: does green nasal discharge require antibiotics? do decongestants really help? does vitamin C cause diarrhea? An entertaining, educational and comforting book for both parent and child!
