Children are very curious about dinosaurs, so it makes sense that they would ask the best and most inquisitive questions about them. Dino-Why?, previously published as The Dinosaur Question and Answer Book, is based on more than 11,000 questions

from real children. The expert answers in this extraordinary book give the most current picture of what dinosaurs were like and what it means to be a "dinosaur hunter" today. Each page is bright and colorful, with beautiful illustrations, descriptive diagrams, and exciting photographs throughout. An index and glossary of dinosaur terms are also included.
