WHAT A WOMAN NEEDS...Less gravity, good lighting, words of affection, to escape from her own head, to nest, to come undone, electricity, that homey feeling, to be shaken and stirred, to get to the juicy part, a little mystery, stain remover, to get over it, an off switch. These are among the many illustrated ideas in this little book of things that every woman needs. With beautiful illustrations and heartfelt prose, this book strips away the complicated, structured way of life we cling to and helps us find perspective in simplicity.
