Iris folding is a simple technique that involves folding papers to create beautiful, spiralling patterns that are similar in shape to the iris aperture of a camera. In this book, Maruscha Gaasenbeek and Tine Beauveser share with you their love of iris folding, providing templates and clear instructions for over 460 beautiful greetings cards based on iris-folded designs. It combines three previously published books by the same authors: "Iris Folding Compendium", "Iris Folding Compendium Part 2" and "Iris Folding Compendium Part 3", and represents a fantastic source of inspiration and ideas for cards for all occasions.
