装帧:

isbn:9780713688184

This book is aimed at anyone who wants to work with clay with primary school aged children and who feels that some guidance towards possible projects would be useful. All the basic forming methods are demonstrated and then possible projects are suggested. The authors also point out how these projects can be related to specific teaching topics. The book is highly illustrated with both line drawings of the working methods and colour photographs of children's work. This book will be a useful tool for any teacher or parent wanting to work with clay with their children.
