出版时间:2008-4-10

装帧:Paperback

isbn:9780547053561

This essential biography of one of the most influential women of the past century shows how truly remarkable Jane Goodall's accomplishments have been. Goodall was a secretarial school graduate when Louis Leakey, unable to find someone with more fitting credentials, first sent her to Gombe to study chimps. In this acclaimed work, Dale Peterson details how this young woman of uncommon resourcefulness and pluck would go on to create a paradigm shift in the field, helping to set radically new standards in the study of animal behavior. He vividly captures the triumphs and

setbacks of her dramatic life, including the private quest that led to her now-famous activism. Candid and illuminating, this book will be a revelation even to readers who are familiar with the public Goodall as presented in her own writing. Peterson, a longtime Goodall collaborator, has a unique knowledge of his subject, and he provides a deeper understanding of the woman who has been a role model and inspiration for so many people.
