Seashores, snow-capped mountains, old-growth forests, and visitor-friendly cities have made the Pacific Northwest one of the most popular RV and tent-camping destinations in North America, and this guide directs the way to over 130 camping destinations throughout Oregon, Washington, and British Columbia. Combining the functions of a camp directory and a sightseeing guide, each of the expanded number of entries describes a vacation spot and its attractions and recommends good camping in the area, including both privately owned and state and county campgrounds. Updated, detailed maps of each destination show the location of campgrounds and tourist sites, as well as exact routes for drivers of large RVs. Several one-week itineraries from the gateway cities of Portland, Seattle, and Vancouver provide alternate driving adventures on scenic routes throughout the region.
