In this inspirational and informative book, Dani's parents, Jay and Sue Shotel, vividly convey the strength and courage their daughter displayed in her battle with AML, as they tell the story of the events that led to her recovery. Along the way they provide a wealth of information about leukemia, and tell engrossing stories about their family's journey to an unknown place, the roles each family member played to support Dani in her fight for life, the value of love and friendship, the anguish in the quest for answers, the power of positive thinking, the vital decisions a family must make as they proceed through the medical maze, and about the young German citizen, Tom--who donated the marrow that saved Dani's life and then flew in to Washington, D.C., to attend Dani and Scott's wedding in 2005. The vivid details in *It's Good to Know a Miracle: Dani's Story*, are made possible because Sue Shotel insisted that the family keep a log of everything that occurred during the period from September 11, 2002, until Dani's release from the Seattle Cancer Care Alliance and return to Washington, D.C. in May of 2003. In telling their story, the authors hope that the level of detail provided in this book will assist families who face similar circumstances in dealing with the known, the

unknown, and the decisions that need to be made along the way.
