If Hillary Clinton won the Democratic Party nomination in 2008, it would continue a trend of a Bush or a Clinton being on a national presidential ticket for the last 28 years in the United States. Never before in the history of the nation have two families dominated the political process in such a manner. This two-family domination has endangered the American presidency as a representative institution and has allowed personal, family issues to dominate policymaking at a crucial time in American history. The problems with the Hillary Clinton campaign in 2008 and the current struggles of the second Bush presidency should give pause to those Americans who are contemplating a second Clinton presidency or a third Bush presidency. By examining the political careers of three Bushes (George H.W., George W. and Jeb) and two Clintons (Bill and Hillary), this book will highlight the problems and the consequences of combining the most powerful political office in the world with family legacies.
