While poking around their neighborhood, mystery-solving, swamp monster-fighting middle-graders Arlie and Ty find a buried coffee can filled with the bones of a hamster and the handwritten curse (on glittery unicorn notepaper) from his home-schooled owner, Mandy: ""Here lies Cuddles McGee. A curse upon those who disturb his grave.""The fact that the i in "lies" is topped with a heart doesn't make them any less scared, especially when the obese, angry, and undead Cuddles comes back to life and starts trashing the town. Once again, it's up to Arlie, Ty, and Mr. Boots -- the fashionably dressed Chihuahua, to save the town from destruction, reanimated dead hamster-style.
