Since the opening of the first permanent railway in 1833, hundreds of railroad

companies have operated in North Carolina. Rail transportation, faster and more efficient than other methods of the era, opened new markets for the products of North Carolinaas farms, factories, and mines. Over the years, North Carolina rail companies have ranged in size from well-engineered giants like the Southern Railway to temporary logging railroads like the Hemlock. Cross ties and rails were laid across almost every conceivable terrain: tidal marshes, sand hills, rolling piedmont, and mountain grades. Vulnerable to the turbulent and unregulated economies of the day, few railroad companies escaped reorganizations and receiverships during their corporate lives, often leaving tangled and contradictory histories in their passing.
