Affordable, attractive and timeless furniture for the home is made possible with this project guide that includes 32 easy-to-build classic country pieces, from small candle boxes and footstools, to a large Amish wardrobe and corner cupboard. With basic

woodworking skills, a modest workshop and a trip to the local lumberyard, builders are ready to use the detailed plans, exploded diagrams and complete cut and dimension lists to reproduce beautiful designs that have endured for hundreds of years and are still wildly popular. Invaluable instructions are featured and simplified in a sequence of photographed steps. Bill Hylton is a frequent contributor to woodworking magazines, including "Woodworker's Journal".
