出版者:Cambridge University Press

出版时间:2009-4-13

装帧:Hardcover

isbn:9780521572019

This book in the highly respected Cambridge History of Science series is devoted to the history of the life and earth sciences since 1800. It provides comprehensive and authoritative surveys of historical thinking on major developments in these areas of science, on the social and cultural milieus in which the knowledge was generated, and on the wider impact of the major theoretical and practical innovations. The articles are written by acknowledged experts who provide concise accounts of the latest historical thinking coupled with guides to the most important recent literature. In addition to histories of traditional sciences, the book covers the emergence of newer disciplines such as genetics, biochemistry and geophysics. The interaction of scientific techniques with their practical applications in areas such as medicine is a major focus of the book, as is its coverage of controversial areas such as science and religion, and environmentalism.

评论

从我个人的学习体验（从新文化史到医疗疾病史和环境史）出发，强烈推荐这本书。。把这些国内新兴史学领域纳入到生命科学和地球科学史的大学术背景下来思考，肯定很有裨益（至少能了解很多重要的背景知识）。

应该是我对目前专业唯二的兴趣所在了
