Woo-woo the wind blew in the trees. Squeak-squeak went the lanterns. And the dark was all around. After a long winter sleep, Frog can't wait to get back to his pond. But just before jumping into the water, something startles him--then sends him running back to the woods. A HUGE Pond Monster with enormous claws Will Frog ever get a chance to swim in his pond again? And will he and his friends figure out who the Pond Monster really is? With a vibrant text and atmospheric artwork, this book illustrates perfectly how some things are not as scary as they seem.
