Here is a third volume in the extraordinarily successful Andrea Press FAQ series F.A.Q.

Cars and Motorcycles provides a step by step guide to the process of how best to depict, assemble, paint, apply decals etc. to your model. The book has been designed around the experience of two of the best modelers in the world, Juan Layos and Juan de Dios Catena. The detailed descriptive copy is accompanied by 100's of full color step by step detailed photographs. A must for any car or motorcycle modeler. REVIEWS .."I highly recommend this book to car modelers of all skill levels. I am confident that anyone with an open mind and the desire to improve their models will enjoy this book. Buy it-you'll be glad you did "Internet Modeler 03/2008 .." every person building a model car or motorcycle should have this book on the shelf. For the beginner, this is an unbelievably valuable step-by-step training manual. For the experienced car modeler, this book could be the best reference on the shelf. From one modeler who occasionally builds a car, but has always wished he could do the job better, I have to give this book my highest recommendation... "Gotta Have It "IPMS 04/2008
