Advanced Medicine Recall is written primarily for fourth year medical students, sub-interns, and interns. It expands upon the core clinical specialty areas within internal medicine—cardiology, pulmonology, nephrology, gastroenterology, hematology, oncology, infectious disease, endocrinology, allergy and immunology, rheumatology, neurology, and dermatology. This book is written in the rapid-fire question and answer format of the Recall Series , with the question on the left side of the page and the answer on the right. Mnemonics are interspersed throughout. Additional chapters in Advanced Medicine Recall include Environmental Medicine, Psychiatry, and The Consultant. The focus of the advanced material is on differential diagnosis, patient management, and disease management.
