Completely updated and now in full color throughout with many new illustrations, the Fourth Edition of this practical manual is a step-by-step guide to performing regional anesthesia procedures. This edition's improved and expanded program of illustrations includes detailed full-color anatomical drawings and clinical photographs correlated to drawings of needle placements. The state-of-the-art coverage includes the latest advances in ultrasound-guided procedures and continuous catheterization. A consistent outline format throughout this edition makes the text accessible and easy to use. Chapters cover all areas of regional anesthesia, including peripheral, central, obstetric, pediatric, ophthalmic, head and face, ambulatory anesthesia, and postoperative pain management.
