If you follow just the no-cost and low-cost tips in this book, you will save over \$2,000

and prevent the emission of 25,000 pounds of carbon dioxide (CO2) every year! A new edition of our classic book with updated information on hybrid cars and a bold new cover. Gallup polls indicate that 70 percent of Americans are concerned about global warming. You Can Prevent Global Warming converts this public concern into positive action, providing simple, everyday things you can do to minimize global warming-and save money at the same time! The book contains 51 topics, but there are actually hundreds of tips and suggestions within the book that will help you address this global problem. Whether you are one of the nearly three-quarters of Americans who consider themselves environmentalists or you're interested in practical ways you can save money each year, these straightforward tips will make this one of the most important and useful books on your bookshelf.
