An odyssey of the heart begins the moment theater director Lucas Cameron discovers a box of letters written to his now-deceased grandmother by her protA(c)gA(c), Jessica Fontaine. Jessica disappeared from the stage years before, following a tragic accident. Through her letters, Lucas comes to fall in love with this passionate, talented woman, and seeks her out - only to find a bitter recluse whose hopes and desires have been crushed by fate. Although she refuses to return to New York and the life she abandoned, Jessica and Lucas begin a correspondence that strengthens and sustains her. This lifeline helps her to return to the career from which she was cruelly wrenched, and to the man who steadfastly loves and believes in her. One hesitant step at a time, she begins her journey back to her art, and to a life where anything - even love - is possible.
