Practice Anatomy Lab (PALa ) 2.0 is an indispensable virtual anatomy practice tool that gives students 24/7 access to the most widely used lab specimens, including the human cadaver, anatomical models, histology slides, cat, and fetal pig. Each of the five specimen modules includes hundreds of images as well as interactive tools for reviewing the specimens, hearing the names of anatomical structures, and taking multiple choice quizzes and fill-in-the-blank lab practical exams. Specimen images are also linked to animations.
