Using over 400 A-Z entries, this reference provides an essential foundation of business and economic knowledge for middle-school through community college students. Short features scattered throughout add interest, while demonstrating how economics affects daily life. "Money for Minors" shows how to evaluate offers from banks and credit card companies, read the business section of the newspaper, understand the importance of various government statistics, and more. It is also for anyone doing research on everything from the Great Depression to credit card debt to real estate to inflation.
