isbn:9781600610950

Each of the 40+ beaded projects in this book features a handcrafted mixed-media element that will appeal to readers of all crafting skill levels and inclinations, from DIY crafters to experienced beaders to beginners in either niche. The jewellery projects

incorporate a wide variety of interesting elements, including handmade pendants and charms crafted with everything from polymer clay to decoupaged wooden beads. Other unexpected materials include sequins, buttons, phone wire, snaps, washers and tin. And of course, the projects call for plenty of traditional beads and findings as well. The final chapter showcases an innovative selection of gifts and cards. All projects have step-by-step instructions and sophisticated still photos to accompany each step.
