Science for Lawyers clearly explains and discusses 13 applied scientific disciplines in

jargon-free language that is specifically geared toward lawyers. The book explores the definitions (what is science), the practice (what scientists do) and the professional roles (what ethical guidelines influence scientists) of 13 professional disciplines such as ballistics, medicine, physics, statistics, linguistics, genetics, chemistry and more. With dozens of photos, figures, graphics and artwork, the book covers these subjects in terms that are not only easy to understand, but fascinating to read. If you are a lawyer who is ever called upon to defend, proceed against, examine, cross-examine or even consult a scientist, this book is for you.
