This series provides readers with a history and survey of education in many of the region's countries. It examines the Primary, Secondary, and Postsecondary levels of education, identifying the types of education available (public, private, tutoring, etc), any race, gender or social class issues that impact education, and major reforms taking place. Readers will find discussions of curriculum and teaching methods, which are most helpful, as well as a special "day in the life" feature, which gives a personal look at what it's like for students attending school in that country today.
