isbn:9780415468657

The second edition of the critically acclaimed Text Atlas of Wound Management presents new features for dermatologists and nurses who deal with the practical and clinical aspects of wound management. Expert contributors provide a hands-on approach to diagnosis and wound management, as well as a broad exposure to cutaneous wounds-both acute and chronic-to ensure complete exposure to the problems encountered and solutions offered. This colourful guide enables the reader to feel as though he or she is analyzing wounds alongside the experts. With high-quality color illustrations throughout, new highlights include a chapter on histopathology and a section on sourcing products.
