Inspired by the questions pediatricians are most often asked, this guide provides on-the-spot, concise advice for those who are unsure about how to handle their child's condition. Offering the insight of a parent of children under the age of three and the experience of a pediatrician, this resource provides information on a diverse range of topics, including "How can ""I be sure that my newborn is getting enough to eat?" "Should I worry that my""child has a fever after getting his shots today?" ""What should I do if I think my""child swallowed a coin? "and "I don't know what vaccine information to trust--should I vaccinate my son?" in a reassuring yet humorous tone.
