Textbook of Clinical Neuropsychiatry provides a comprehensive, encyclopedic and up to date coverage of the complete range of neuropsychiatric disorders. The text is clearly written and well organized, utilizing a consistent and easy to read format

throughout. Part I describes the diagnostic assessment of patients and details the interview, mental status examination, neurologic examination and ancillary investigations. Part II provides a thorough description of the clinical features of the signs, symptoms and syndromes seen in neuropsychiatric practice, with special emphasis on the multiple disorders and lesions that may cause them. Part III goes on to present virtually all of the specific disorders seen in neuropsychiatric practice, in each case detailing clinical features, course, etiology, differential diagnosis and treatment. The authoritativeness, comprehensiveness and lucid organization of Textbook of Clinical Neuropsychiatry make it an essential reference for psychiatrists and neurologists alike, and for students in those disciplines.
