Collage can be more, much more, than just cutting and pasting. It can be a wonderful art form and a means of self-expression. "Collage Journeys" presents a series of innovative workshop assignments, each designed to relate the technique and format of a collage to its subject. Gathering materials, generating ideas, painting with paper, working in layers, using text, keeping a visual journal - project by project - new collage

skills are explored. Stunning finished pieces offer additional ideas and inspiration. For anyone who has ever wanted to take collage to the next level - adding meaning, subtext and style - "Collage Journeys" offers the journey of a lifetime.
