Traditional upholstery skills are still much in demand both for the making of new furniture and for the re-covering of a treasured antique. The processes involved are lengthy but the results will last a very long time. This book takes the student or home upholsterer on from the most basic skills, gradually building up a working knowledge of the various methods, so that by the time he finishes reading, any type of chair can be tackled with confidence. The reference section of the book contains an invaluable guide to tools, springs, fillings and fabrics. The projects which follow range from a deep-buttoned stool to a wing chair, each one demonstrated with step-by-step photographs and explained with clear and concise text.
