Take a winter walk through beautifully embossed, spot-laminated pages--and see what animals you can find along the way Wander with Little Brown Rabbit through a winter wonderland as he leaves his cozy burrow and goes in search of spring. Skipping across snowy fields, a frosty forest, slippery ice, and prickly hedges, he looks everywhere for a warm breeze and some green grass. All the other animals--including a wise owl, friendly fox, and kindly bear--try to help. But all the tired bunny can see is a blizzard on its way and fierce winds whipping up the snow. Will winter "ever" end? Lorna Hussey's softly-hued art features lots of appealing creatures for children to find, from Arctic hares whose white coats blend into the environment to tiny birds and field

mice hidden within a thicket.
