Whirl the lenticular disc with its constantly changing image—and fly with Santa to the North Pole! What a ride it is, as every turn of the wheel transports wide-eyed kids to a new magical place. The merry Christmas tale begins in Santa's workshop, where he's ready to soar to the skies in his sled. Spin again, and whee! See the small town below where good girls and boys will get their toys, and then over the desert, the city, and around the world to deliver more. And when Santa's all done, give one more spin and fly, Santa, fly ...away home. Merry Christmas!
