Author P. M. H. Atwater knows what it's like to die. And the experience so changed her life that she has devoted years to researching the phenomenon of the Near-Death Experience. From her own encounter with life-after-death and from interviews with hundreds of others, she presents this remarkable and reassuring vision into a world beyond the one we know: What it feels like to die, What awaits us after we see the light, Why many who are rescued from death don't want to come back, Why some people encounter hellish experiences, How life changes after a Near-Death Experience And much more!
