These elegant, traditionally styled designs will enchant and entice you to try the Colourque(R) technique. What is it? Simply the use of colored pencils to re-create the look of intricate applique. All the easily assembled tools and needed materials are

described in detail. Use the designs singly on small projects or combined for larger and full-sized quilts. Delightfully elegant designs in the tradition of Baltimore album quilts can be easily executed. Helen Stubbings is a lifelong resident of Australia who has traveled the world over. A quilter since working on her certificate in needlecraft in 1995, she has been developing, testing, teaching, and selling pattern instructions and workshop kits featuring her Colorque technique since early 2000.
