This book offers ideas for beautiful and inspiring journals, books, and memory gifts (memory boxes, photo frames, small favours, memory jewellery), all styled for the

contemporary bride. Projects range from making books using simple binding techniques to gorgeous but simple "alteration" ideas for purchased books and journals. "Wedding Journals and Creative Memories" will teach even brides with minimum craft experience how to personalise their wedding memories in a beautiful way. Couples will find fresh and clever ideas and inspirations for journaling about their past, present, and their dreams for the future.
