One of the hottest new tools, the scouting camera has become a hunter's best friend. Scouting cameras, triggered by heat and motion, give hunters an extra edge, providing clues as to the habits and whereabouts of deer traveling through favorite hunting areas. Wildlife watchers and families are using these cameras, too, because they enjoy knowing what passes by when no one is around. The authors advise on how to buy the right camera, how to set it up in the optimal location, how to encourage wildlife to visit, and how to interpret the photos you get.
