著者:Elizabeth Eisner Reding

出版者:Course Technology

出版时间:2008-5-2

装帧:Paperback

isbn:9781423999539

This book was written as a guide to using Google products. Many people are accustomed to using Google to perform searches on the Internet, but are no unfamiliar with some of the other products available bearing the Google brand. Due to the

ever-changing landscape of Google products, an effort was made to keep steps as generic possible to prevent them from becoming outdated.
