With twenty per cent of the earth's species facing extinction by 2030, this striking atlas brings up to date the data on those that have been lost already, those that are threatened, and those that are surviving today. Vividly illustrated with full-color maps

and detailed graphics, "The Atlas of Endangered Species" catalogs the inhabitants of a wide variety of ecosystems, including forests, mangroves, and coral reefs. It examines the major threats to biodiversity, from loss of habitat to hunting, and describes the steps being taken toward conservation. It is copublished by Myriad Editions.
