Make the most of your Mac Are you looking to get the best out of your new Mac, either as a complete novice or as a convert from a PC? Or have you just upgraded to Leopard and want to know what's new? Either way, this is the book for you. "Teach Yourself Basic Mac Skills" offers a wider, more beginner-friendly scope--an all-in-one reference for those who want to understand the basic concepts rather than the in-depth technicalities. Focusing on email, iPhoto, iCal, iMovie, iTunes and other iLife applications, it will help you to enjoy the full Mac experience. With straightforward writing from expert authors, this book cuts through the "techno babble" and instead gives you easy and enjoyable access to all of the computer skills you want to acquire.
