The consolidation of the European Union created a large single European market, comprising 27 member states and about 500 million people with its own legal framework for online business activities. This book offers a quick and easy reference for lawyers, business professionals, and students to the most important EU legislation for e-business activities. Topics include: E-commerce, Consumer protection, E-signatures, Copyright and information society, Conditional access, E-money, Domain names, Privacy and data protection, Applicable contract law, and Jurisdiction
