isbn:9780230612198

Fike takes current scholarship a few steps further and fills a gap on both the literary and psychoanalytical side. The Jungian, like the Freudian approach, is popular to the discussion of plays. This book is thoroughly researched and adequately places new readings of Shakespeare and Jung in their proper context. Fike examines manifestations of the collective unconscious in order to provide a fresh understanding of individuation in selected plays from Shakespeare's canon.
