Fisher-Price Little People, a welcoming and useful household theme, and dozens of stickers to use on a huge fold out scene all make for an irresistible title. Preschoolers love Little People, and they love stickers. And this book is literally packed with both. Inside, Eddie and Sarah Lynn take readers for a tour of their house and all its rooms in "Welcome to Our House." Included are over 50 reusable stickers of household items, pets, items for the backyard, kids' favorite Little People characters, and more. In the back of the book is the huge fold-out panoramic scene, which is a friendly and colorful look at the house and backyard, and then into several rooms. This little book will lead to hours of interactive fun.
